

PRESS RELEASE

Beamish Construction Inc.

Today Beamish Construction Inc. is reconfirming their commitment to Elliot Lake and the North Shore Area.

Beamish Construction Inc. (formerly K.J. Beamish Construction Co. Ltd) has operated a locally based construction company since 1976, regionally since 1973, and our affiliate Ellwood Robinson Inc. has provided services to Elliot Lake from its beginning.

Beamish Construction has always been a supporter of local initiatives and many area projects. We believe that making the whole North Shore Area vibrant benefits everyone, including our customers and employees.

The whole North Shore Area project of supporting the "Installation and Operation of a CT Scanner" at St. Joseph's Hospital is a truly noble cause.

We realize the CT scanner will greatly enhance the patient care experience and help eliminate the over 2,200 trips made annually out of the region for this service, which currently can only be accessed in Sudbury or Sault Ste. Marie. This is a benefit to demonstrate the continued vibrancy we are trying to achieve.

On behalf of Beamish Construction Inc. , our president Marcel Ethier, and all our employees we are once again standing up to show our support to the whole North Shore Area by committing a donation of \$25,000.00 to this cause.

We offer a friendly challenge to the other business to join Beamish Construction being identified as a supporter of the CT Scanner at St. Joseph's Hospital in Elliot Lake.
